

ComTec Cloud Battlecard

Our focus is committed to providing highly compliant unified communications to customers across all regulated industries including, healthcare, finance, technology and government. We are committed to the success of our customers and our partners.

Voice Built For Healthcare

ComTec's iConnectRX platform is uniquely designed to address the needs of the healthcare community through a single unified communications solution. Our feature rich platform allows you to provide better patient interaction and improve satisfaction while eliminating the need for multiple services.

Unique features your healthcare practice needs. State of the art encryption & security measures ensure your system is fully HIPAA compliant and your patients' privacy is protected.

Unique Features

- Networking of Remote Offices
- Remote Scheduling Coordinators
- Patient Call Tracking
- Patient Notification Reminders
- After Hours Physician Notification
- Automated Attendant for Patient Call Flow

Integration

Our platform is fully integrated with EMR and EHR - Click to call features can turn documents and records into contact sheets that connect staff with patients, other offices, labs, and more.
